PRACTICAL 4

Dynamic UI, JavaScript DOM, Event Handling & Local Storage

Student Name	KIRTAN KAKADIYA
Enrollment / Roll No.	25CS026
Program / Semester	3RD
Course / Subject	WEB DEVELOPMENT FRAMEWORK
Faculty Name	BRINDA MAM
Submission Date	08-10-2026

1. Aim

To develop an interactive web page using HTML, CSS and JavaScript that demonstrates dynamic UI components, DOM manipulation, event handling, localStorage, CSS animations/transitions, and basic accessibility.

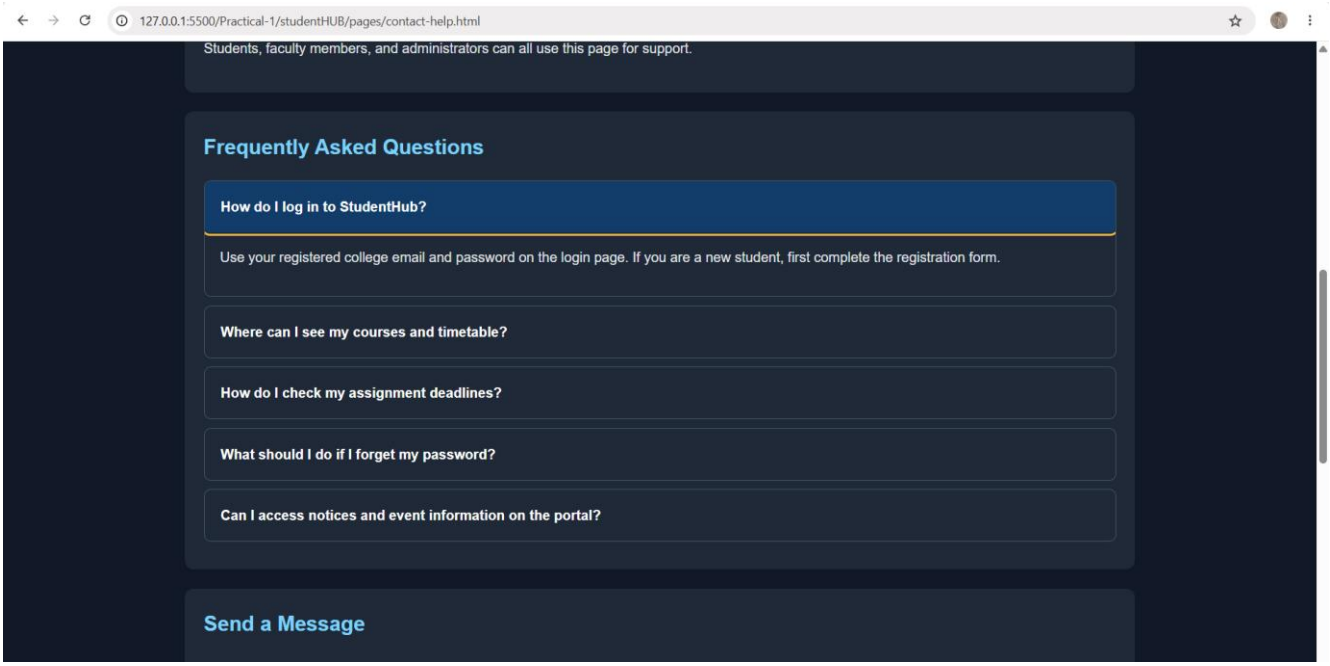

2. Practical Requirements

- Dynamic UI – FAQ, modal popup, image/content slider, notification banner, hamburger menu, and light/dark theme.
- JavaScript DOM – Select and modify HTML elements using JavaScript.
- Event Handling – Use click/events for all interactive components.
- localStorage – Save and remember the light/dark theme.
- CSS/Animation – Add basic transitions/effects.
- Accessibility – Ensure buttons and menu controls are easy to use.

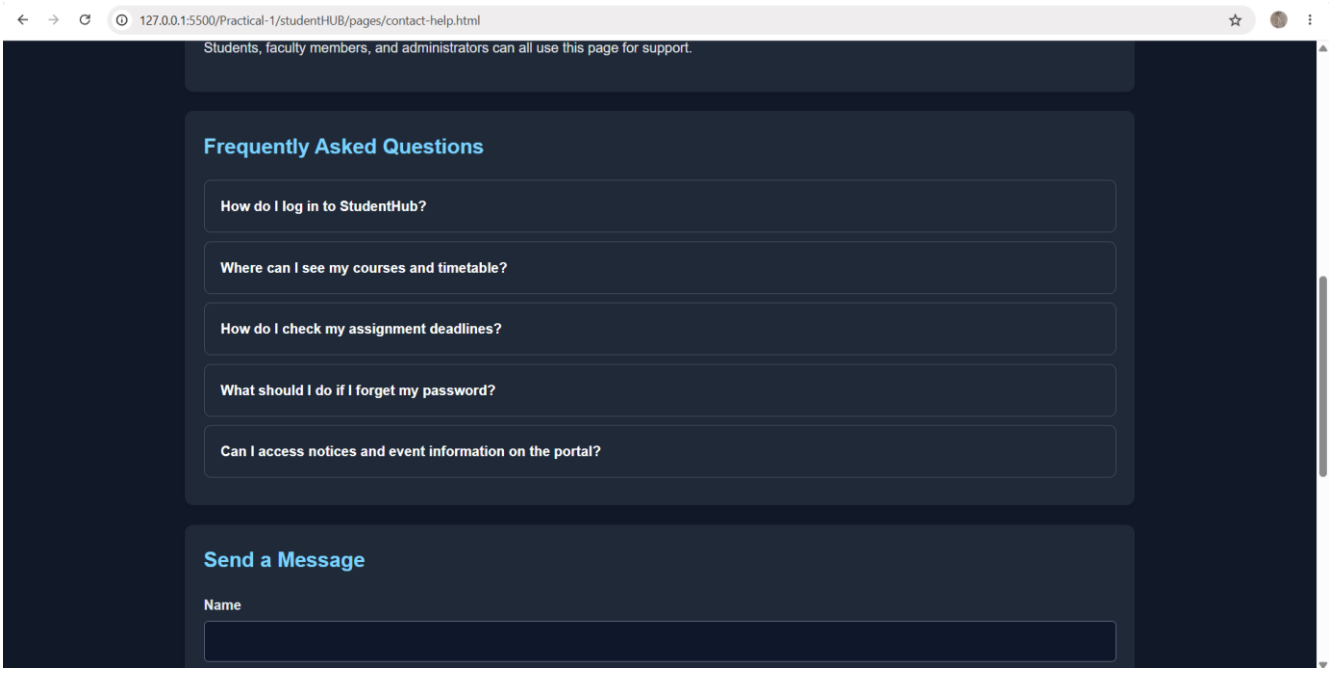

3. Implementation / Demo Screenshots

Insert the screenshots in the sections below. Each screenshot should clearly show the relevant UI state and, where useful, the browser address bar or application context.

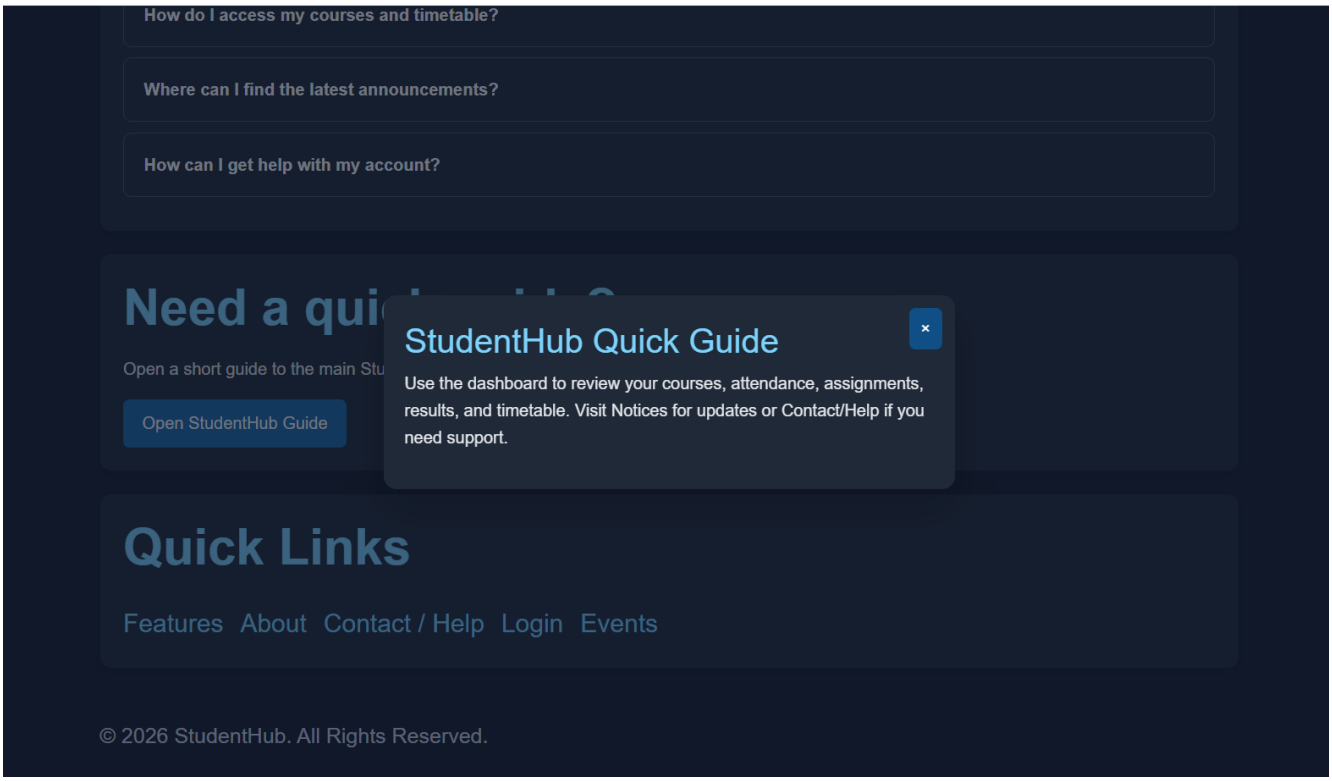

3.1 FAQ – Open State

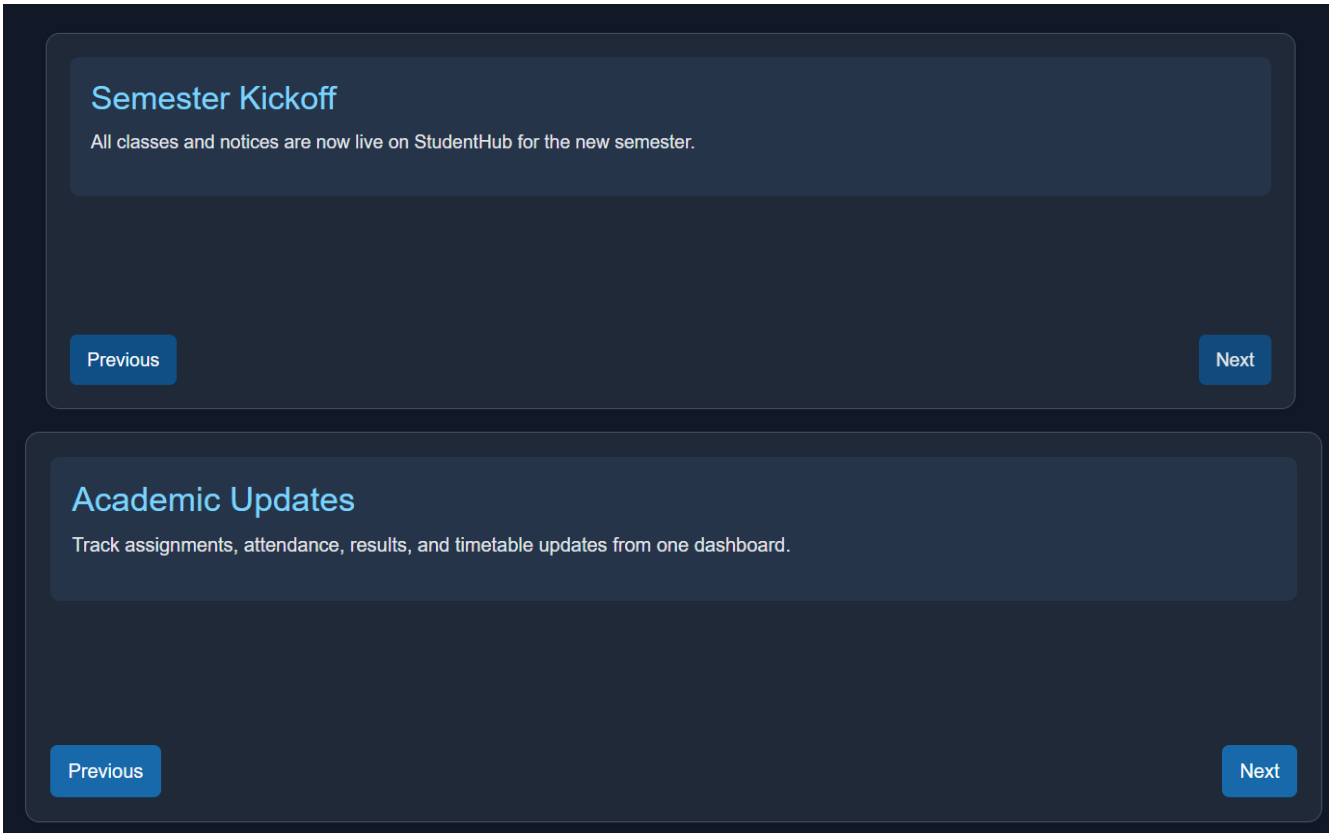

3.2 FAQ – Close State

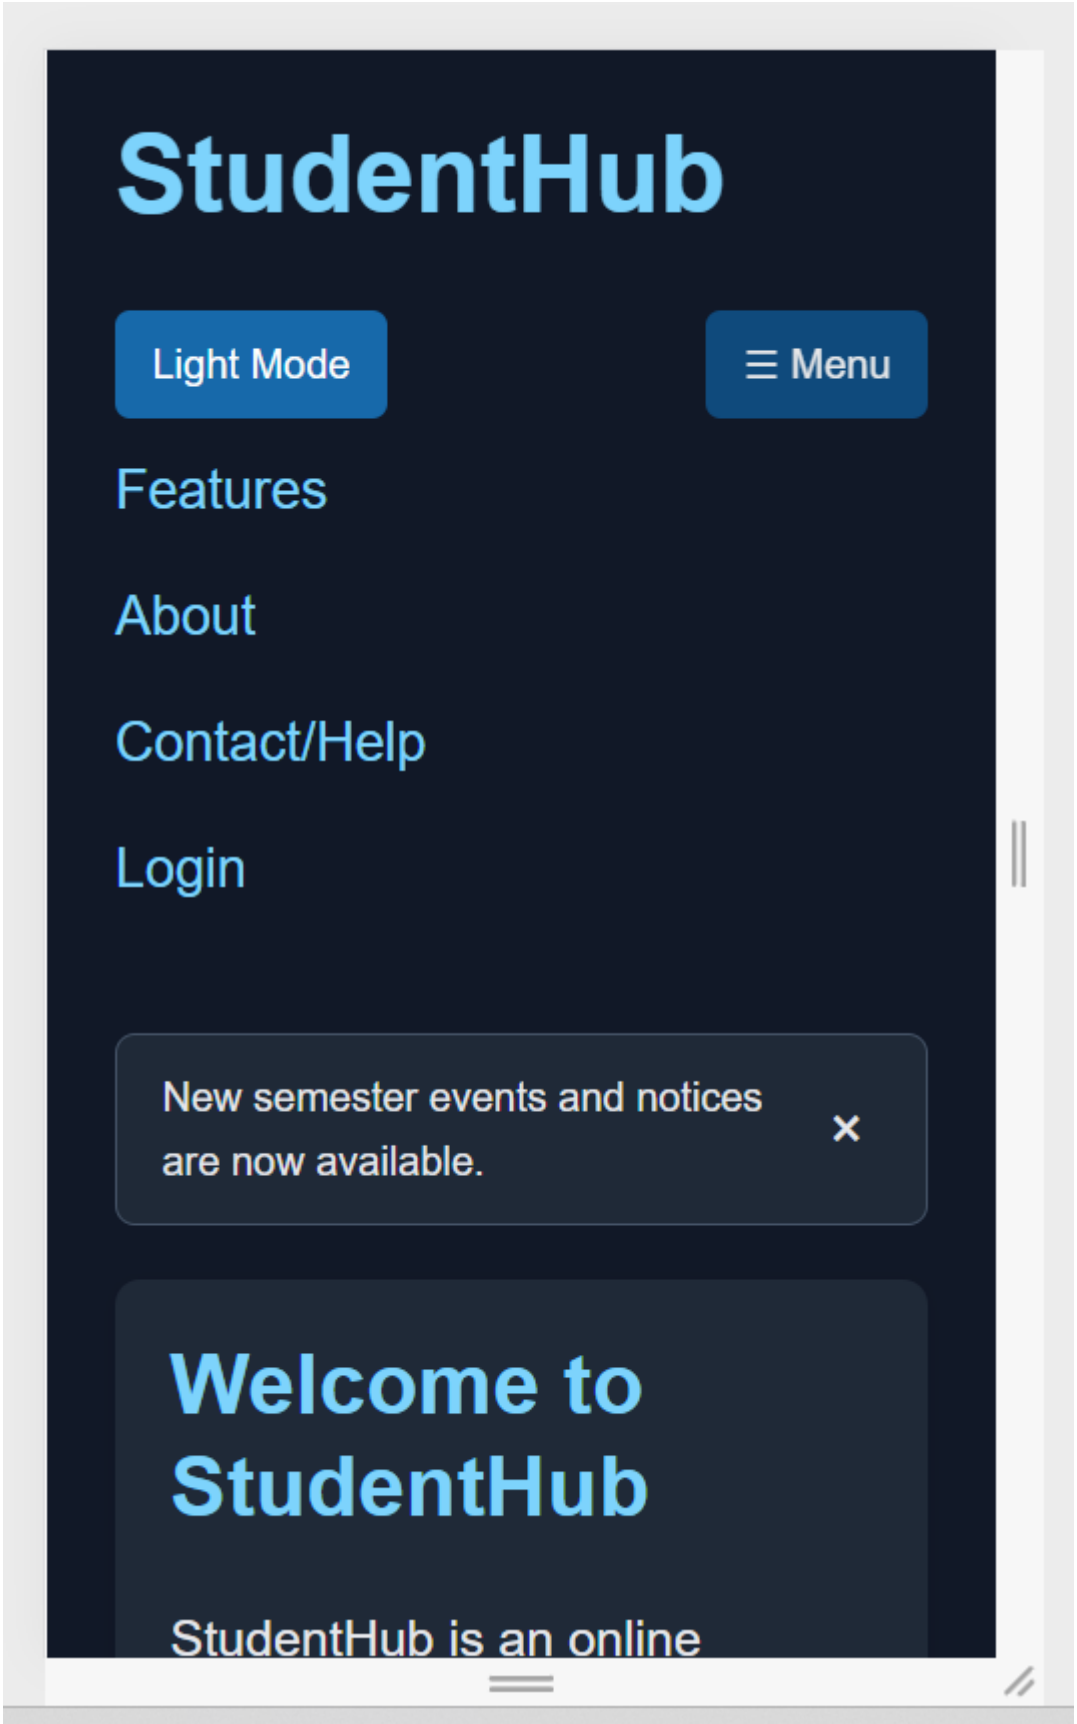

3.3 Modal Popup

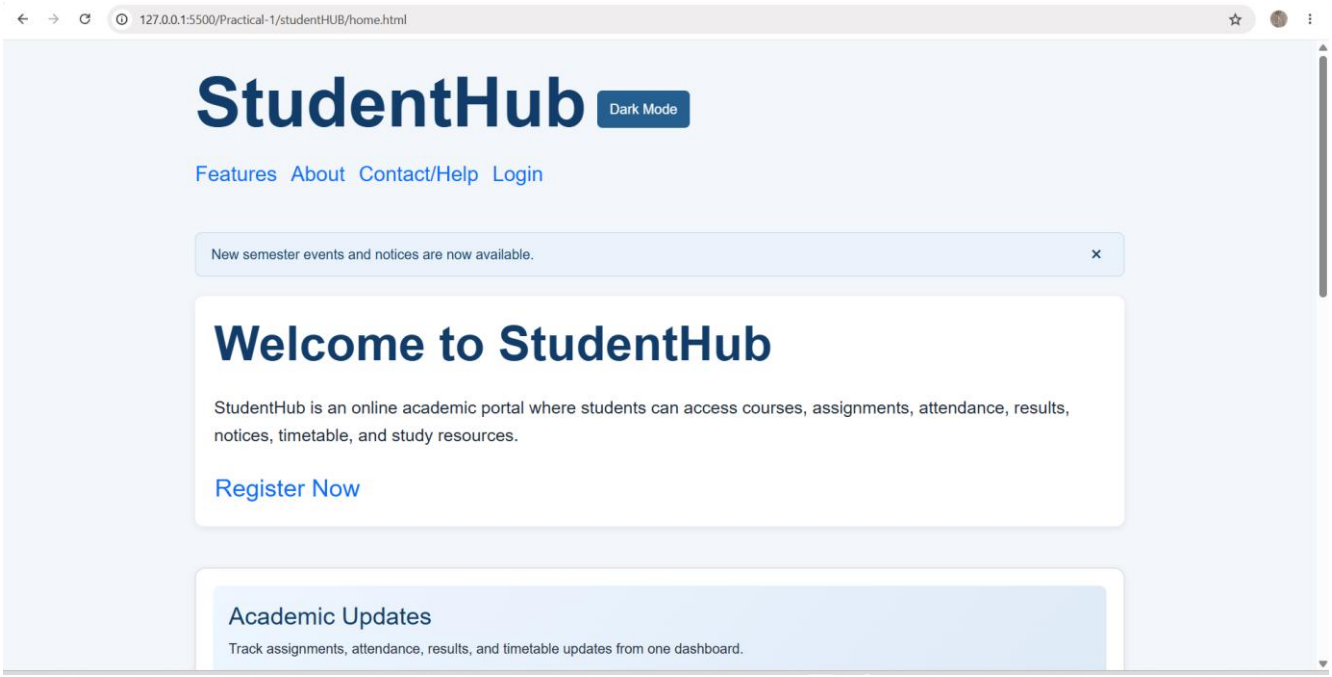

3.4 Image / Content Slider

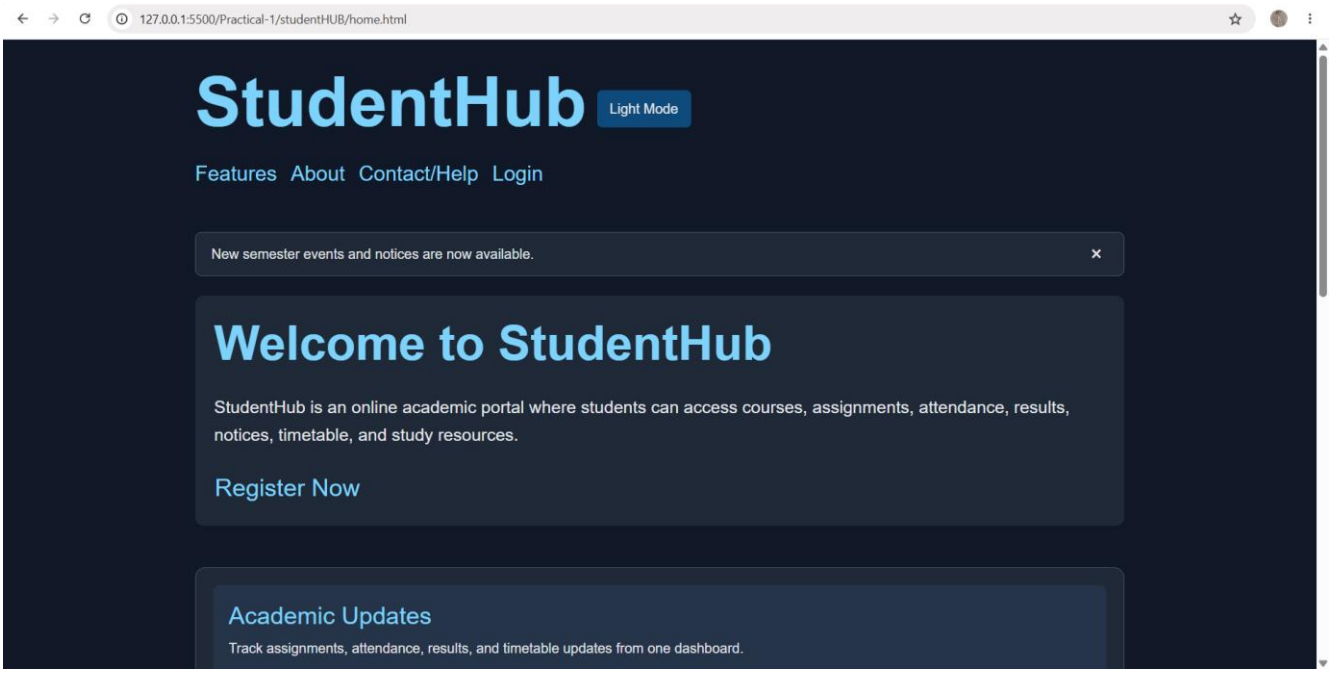

3.5 Hamburger Menu

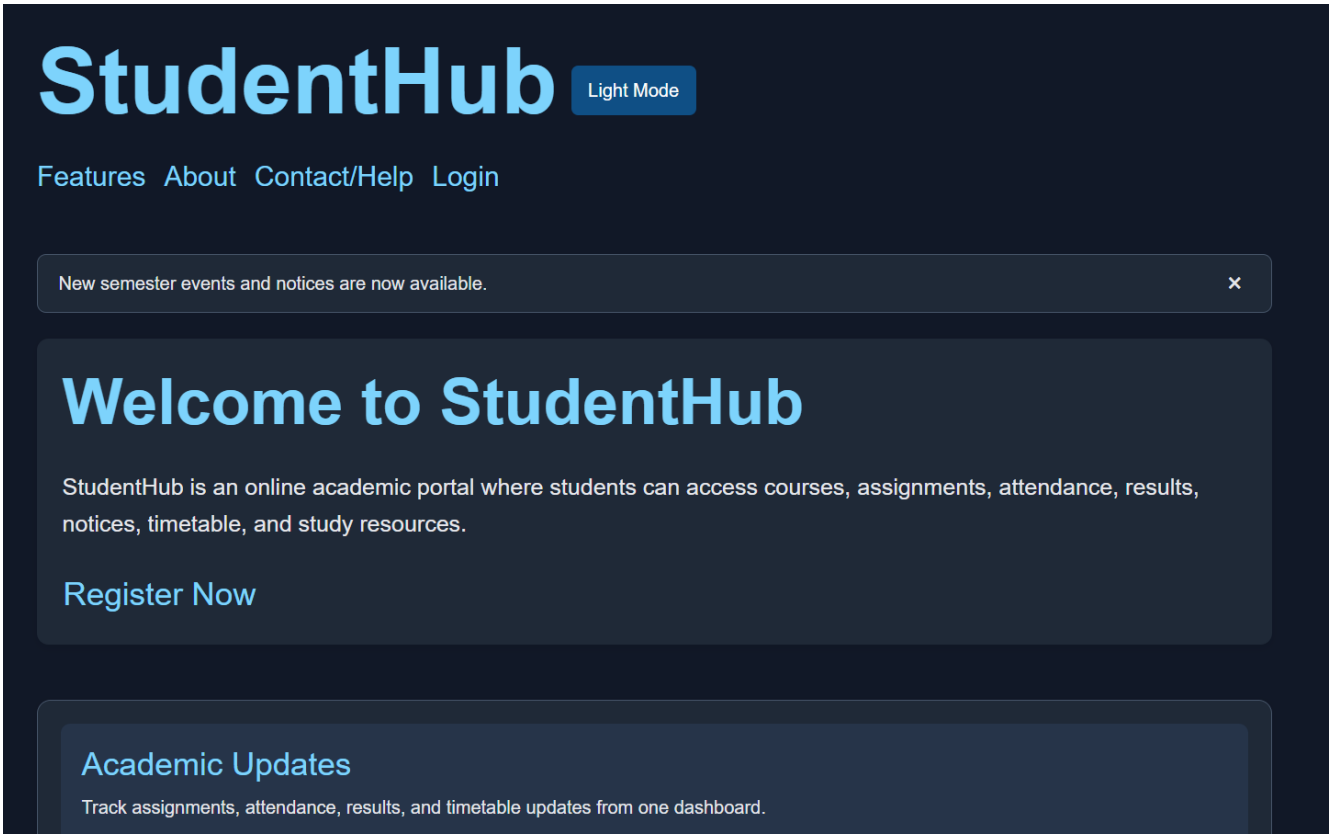

3.6 Light Theme

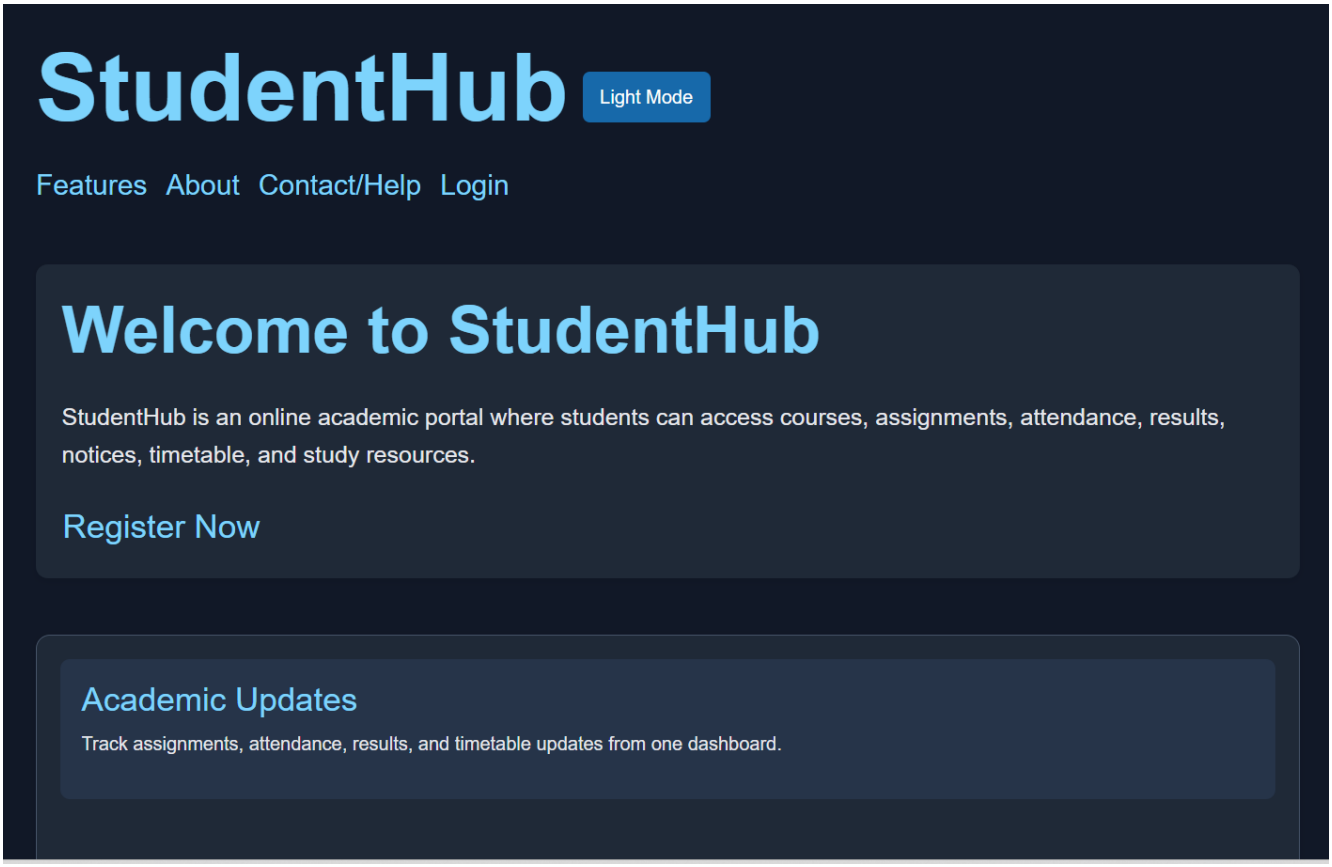

3.7 Dark Theme

3.8 Notification Banner

4. Result

The practical was successfully implemented and demonstrated using interactive UI components. The webpage includes FAQ open/close functionality, a modal popup, an image/content slider, a hamburger menu, light/dark theme switching with theme persistence, a notification banner, JavaScript DOM manipulation, event handling, and CSS transitions/animations.

5. Conclusion

This practical demonstrates the use of JavaScript for DOM manipulation and event-driven interaction in a web page, along with localStorage, CSS effects, and basic accessibility considerations.
