PRACTICAL 5

Student Registration Form – HTML5, JavaScript Validation & Regex

Student Name	KIRTAN KAKADIYA
Enrollment / Roll No.	25CS026
Program / Semester	3RD
Course / Subject	WEB DEVELOPMENT FRAMEWORK
Faculty Name	BRINDA MAM
Submission Date	08-10-2026

1. Aim

To create a student registration form using HTML5 and JavaScript with appropriate input types, client-side validation, regular expressions, password-strength checking, field-level error messages, and basic accessibility.

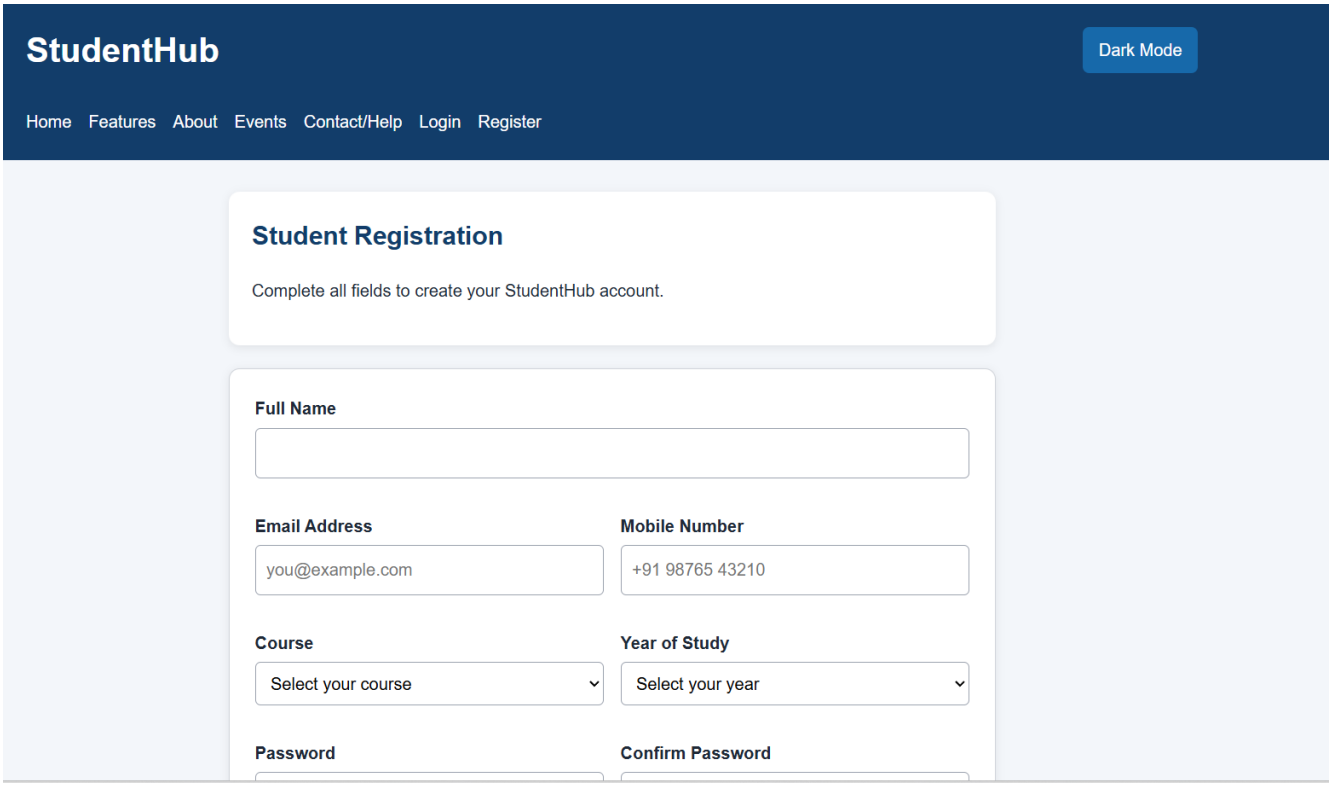

2. Practical Requirements

- Registration Form – Student form containing Name, Email, Mobile, Password, Confirm Password, Course, Year, Gender and Terms.
- HTML5 Input Types – Use correct input types and attributes.
- JavaScript Validation – Validate all required fields using JavaScript.
- Regular Expression – Use Regex for Name, Email, Mobile, Password, etc.
- Password Strength – Show password strength.
- Error Messages – Display errors near the relevant fields.
- Accessibility – Use proper labels and keyboard-friendly form controls.

3. Required Screenshots / Demonstration

Insert the screenshots below in the same order as the practical instructions.

3.1 Complete Registration Form

Course

Select your course

Year of Study

Select your year

Password

Use 8–64 characters with uppercase, lowercase, a number, and a symbol.

Enter a password to check its strength.

Confirm Password

Gender

○ **Female** ○ **Male** ○ **Non-binary** ○ **Prefer not to say**

☐ I agree to the terms and conditions.

3.2 Valid Input + Successful Validation

Full Name

KIRTAN KAKADIYA

Email Address

25cs026@charusat.edu.in

Mobile Number

1234567890

Course

B.Tech Computer Engineering

Year of Study

Year 2

Password

••••••••••

Confirm Password

••••••••••

Use 8–64 characters with uppercase, lowercase, a number, and a symbol.

Good password

Use 8–64 characters with uppercase and lowercase letters, a number, and a symbol. Spaces are not allowed.

Gender

○ Female ◉ Male ○ Non-binary ○ Prefer not to say

3.3 Invalid Name / Email / Mobile

Full Name

25CS026 KIRTAN KAKADIYA

Enter a name with 2–60 letters. Spaces, apostrophes, periods, and hyphens are allowed.

Email Address

student@example

Enter a valid email address, such as student@example.com.

Mobile Number

+9112345

Enter a valid mobile number with 8–15 digits. A leading + and separators are allowed.

Course

Select your course

Select your course.

Year of Study

Select your year

Select your year of study.

Password

••••••••••

Use 8–64 characters with uppercase, lowercase, a number, and a symbol.

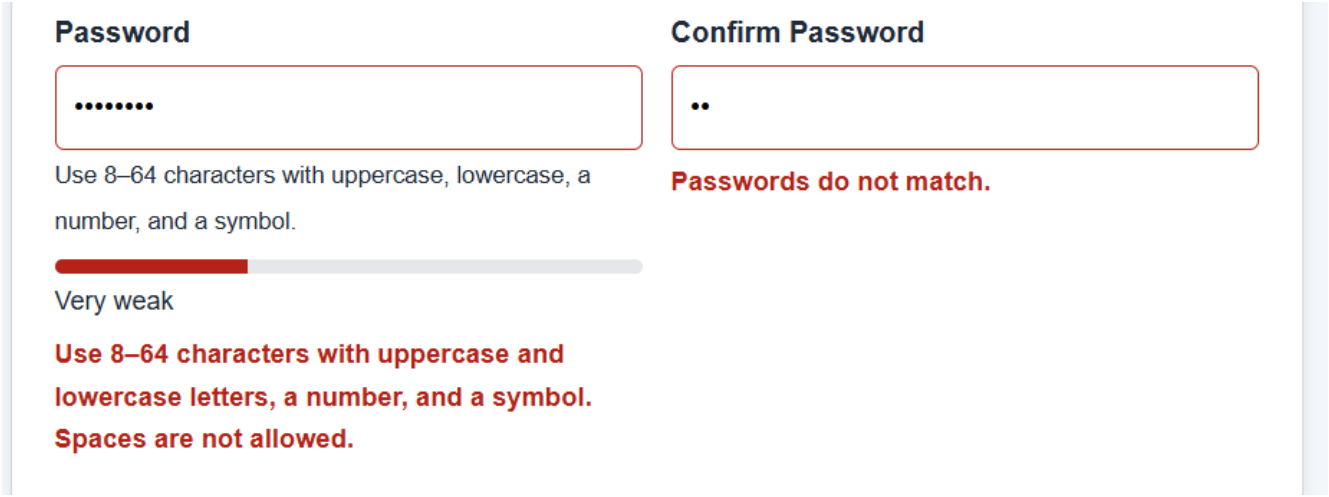

Good password

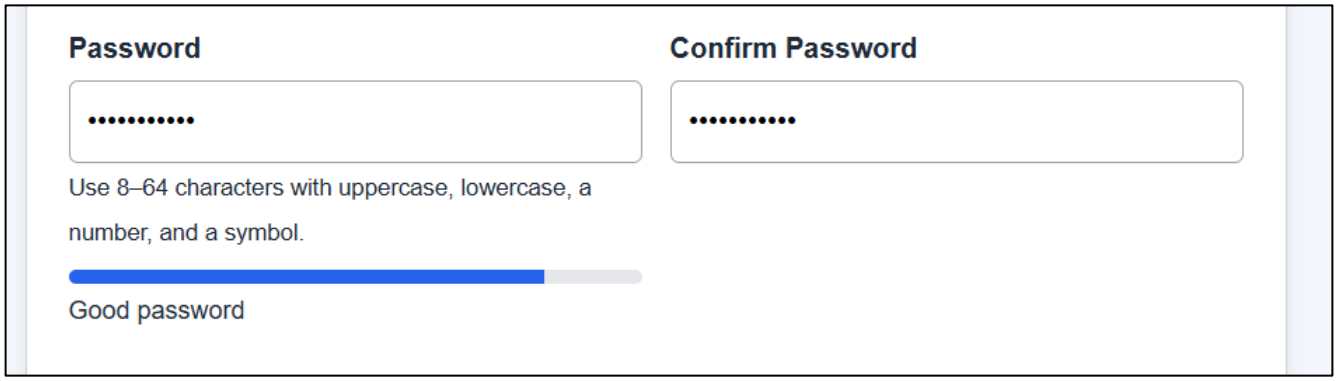

Use 8–64 characters with uppercase and lowercase letters, a number, and a symbol. Spaces are not allowed.

Confirm Password

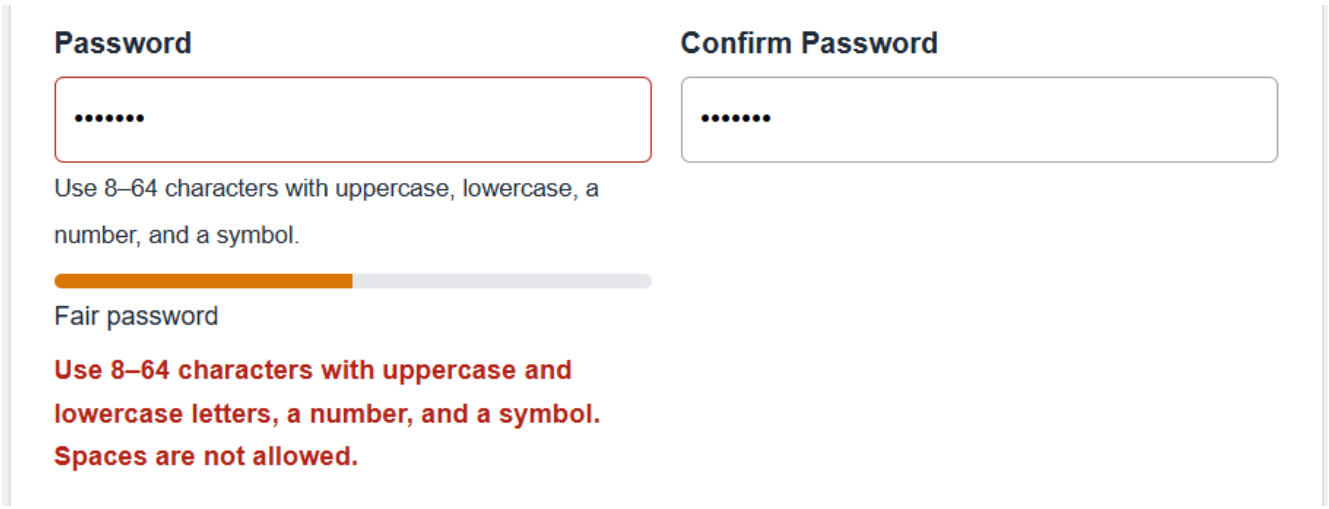

••••••••••

3.4 Password & Confirm-Password Validation

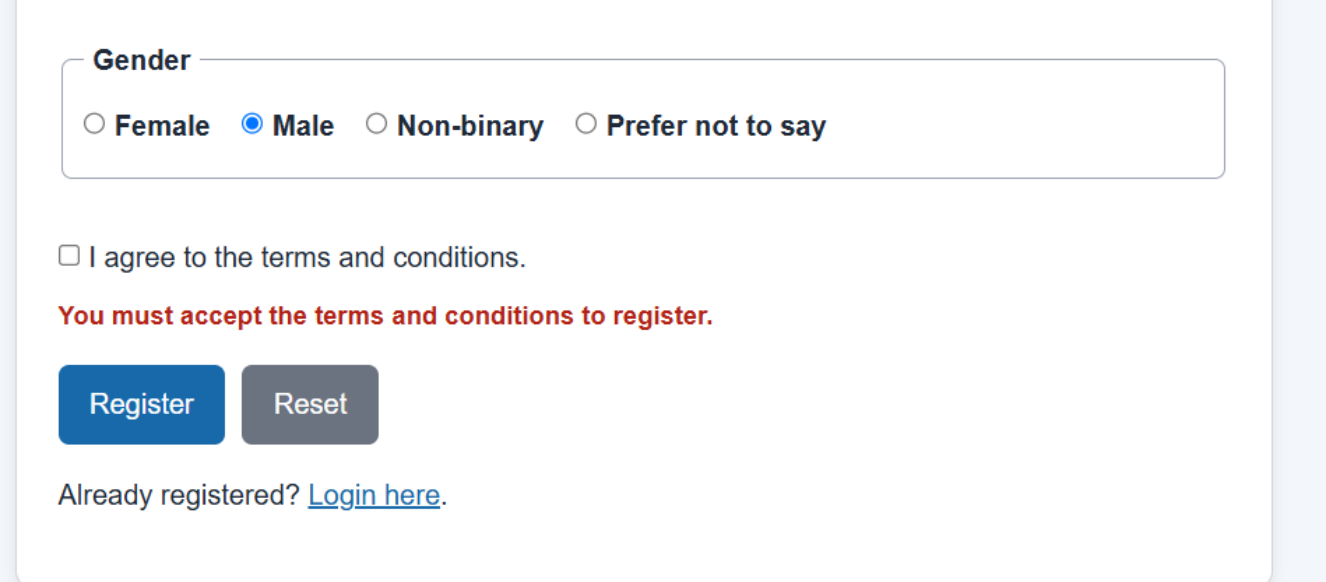

3.5 Password Strength

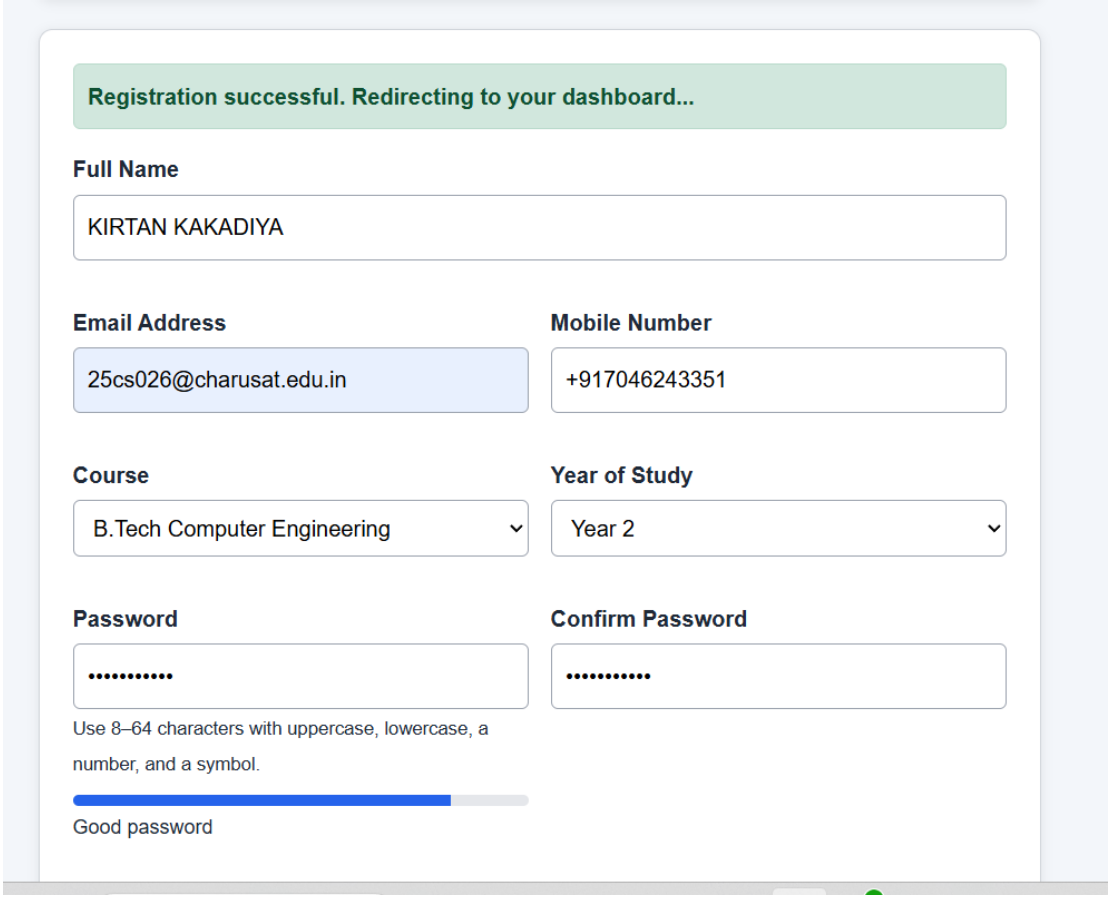

3.6 Terms Not Accepted

4. Result

The student registration form was successfully implemented with HTML5 input types, JavaScript validation, regular expressions, password-strength checking, field-level error messages, terms validation, and accessibility considerations.

5. Conclusion

This practical demonstrates how HTML5 form controls and JavaScript can be combined to create a validated and user-friendly registration form. Regex-based validation, password confirmation, password-strength feedback, error handling, and accessible form controls improve reliability and usability.
